Career Objective

MERN Stack Developer with hands-on experience in building responsive, scalable and user-focused web applications using React.js, Node.js, Express.js, and MongoDB. Passionate about writing clean, efficient code and crafting seamless user experiences. I'm looking for a growth-oriented opportunity to contribute to innovative projects where I can grow as a full-stack developer and bring value through creativity, collaboration, and problem-solving environment where I can contribute to real-world projects, learn from experienced developers, and make meaningful impact through code.

Technical Skills

Frontend: JavaScript (ES6+), React.js, HTML5, CSS3, Tailwind CSS.

Backend: Express.js, Firebase, Authentication & Authorization (JWT, Firebase Auth, Google Auth).

Database: MongoDB, Firebase Firestore.

DevOps & Deployment: Git, GitHub, Vercel, Netlify, Firebase Hosting, VS Code, Chrome DevTools.

Projects

1. SparkFit – A full-featured fitness web platform that connects users with certified trainers and builds a fitness community.
 - Implemented role-based dashboard to strengthen access control, improve usability and protected routes.
 - Developed an admin-controlled trainer approved management system with review and detailed feedback.
 - Engineered an interactive booking and payment flow with Stripe.js integration.

2. Sunset Diary – A modern blogging web application to share stories and explore diverse content.
 - Implemented Firebase Authentication for secure user registration, login, and protected routes.
 - Developed a full-featured CRUD operation for users to create, edit and manage blogs with real-time updates and delete.
 - Integrated like, comment and search functionality to boost user engagement using React and MongoDB.
